

1   **ABSTRACT**

2

3           A method of printing a document containing a printed pattern  
4 of position identification pattern markings comprising: providing to a  
5 printer a set of print instructions which define the content of a  
6 document; generating at the printer a pattern using pattern  
7 information that is independent from the print instructions; and  
8 printing a document that comprises both the content and the pattern.
